

efex Comms is a great option for businesses that need a range of features to keep up with their operations.

Simple, flexible & affordable

There's more to it of course, but by design efex Comms is intentionally a solution that's easy to use and one you can rely on to always keep you connected with your customers and your team.

efex Comms is built on our five pillar foundation

Security. Located on a secure cloud-hosted system that's data encrypted.

Automatic failover. Back up servers across Australia utilise specially designed algorithms to monitor performance. In the case of an event, you're active call switches to an alternative data centre and you won't even notice.

Uptime. Rated to 99.99% which is approved for government & military contractual requirements.

Scalable. Pathways to change or upgrade when your business needs to scale.

Call quality. A second to none end-to-end user experience with HD voice quality.
