

cyber security

A non-negotiable for your business

Cyber security doesn't need to be confusing or daunting, but it does need to be taken seriously.

There's countless examples in the media of businesses and livelihoods being harmed by cyber-criminals. It's an economy worth more than \$1.5 trillion USD (University of Surrey, 9 month study).

Cyber-crime is lucrative and will continue to evolve. Your business needs to evolve too if you want to minimise the risk of an attack.

**Book your
cyber security
assessment**

Start your cyber security journey by asking...

1

How secure is my business?

We audit your existing technology environment

2

How secure should it be?

If we find any gaps, you'll know what they are

3

What can I do to improve?

You can lean on us to significantly reduce your vulnerability

The time is now to protect your business

✓ Workstation & server protection

✓ Dark web monitoring for exposed data

✓ 24/7 Office 365 monitoring & at-risk application updates

✓ Spam & corrupt email blocking

✓ Regular team education & simulation testing

Essential 8 onboarding assessment

We begin with a comprehensive review of your organisation's cyber security posture against the Australian Cyber Security Centre's Essential Eight framework. It identifies gaps in your current controls, and provides an understanding of how well your business is currently aligned with best-practice strategies to mitigate cyber threats and improve resilience.

This assessment comes with a one-off fee, determined by the number of users in your organisation.

Inclusions	Essentials	Premium
Compliance with ACSC Essential 8 maturity	Level 0	Level 1*
