

Device as a Service

Hardware for your modern workplace

A subscription for your tech hardware? Yes please!

Technology is an investment. It's expensive and your cashflow can take a hit every time you onboard a new employee. Device as a Service (DaaS) is a subscription-based technology solution that keeps cost under control and provides your team members with the devices they need to do their job effectively.

An affordable solution that can flex with your team

Add or remove users

Update your subscription annually to suit your workforce & your budget

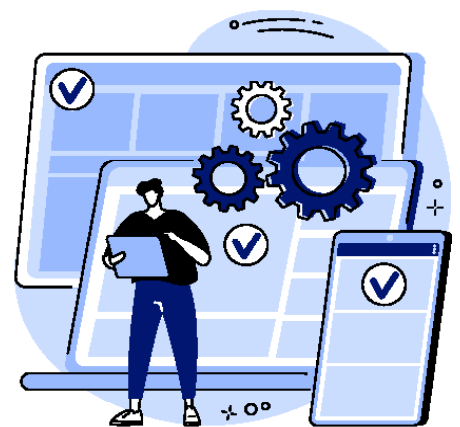

The right devices for your needs

Not every employee needs all the bells & whistles. You only pay for the tech they need

No repair or replacement worries

A 3 year warranty takes care of any issues so you don't have to
